Sundowner's MC12 Utility Trailer Designed for Motorcycle Owners

Coleman, OK --- The all new MC12 Utility Trailer from Sundowner combines their popular utility model and car hauler model to bring you a trailer that fits the specific needs for hauling motorcycles. The protective air dam shields your bike from rock and road debris while the wheel chocks maintain your load position. This 6'9" wide, all aluminum trailer is 12' long with a heavy duty 48" utility ramp. The 2 tread-plate ramp strips ensure safe loading and unloading with ease. Flip on the LED load light that is mounted on the back of the 10" bump rail inside the nose so you can see to secure your bike after your ride. This package has an attractive polished heavy duty extruded aluminum bottom rail and the 30" nose-guard can have six standard skin colors or can be custom painted to match your bike. Popular options include extra length, a stainless nose wrap, logistics track and custom paint. As always, Sundowner encourages customization. The Sundowner MC12 Utility Trailer is covered by Sundowner's 36-Month Hitch-To-Bumper Warranty and 8-Year Structural Warranty.
