

Transporter • Transporter RT

GOOSENECK

The Transporter is a 4 horse head to head trailer with many extra features. The design allows you to pull out any one of the four horses that it will haul without disrupting the others. There's a large window for each horse and a side ramp for easy loading and unloading. The Transporter comes with a fully functional tack room that is offered either at the front of the trailer or at the rear of the trailer. The Transporter is built with the same quality and standards that people have come to expect from a Sundowner.

The TRANSPORTER's tack storage room with many extras is in the front of the trailer. This photo shows an optional spring loaded rear ramp with wrap around tail curtains above the ramp.

The tack room of the TRANSPORTER RT is in the rear of the trailer and features many extras. Both models have a side ramp for easy loading and unloading.
